In the classic monograph mould, this study of *Tyto alba* is the product of almost 40 years field work by its authors and complementary observations by other dedicated ornithologists in Britain, the USA and Europe. The result is a detailed, balanced account based on intimate knowledge of the Barn Owl in varying habitats in Britain, comparing, as appropriate, this race's behaviour with that of sub-species in other areas of the world. There are major chapters on breeding and general behaviour, feeding, distribution, etc, but voice is rightly given a full treatment. The text is graced by Ian Willis's fine drawings and there are 31 photographs plus a colour frontispiece.
