## Advances in Bioceramics and Porous Ceramics III: Ceramic Engineering and Science Proceedings, Volume 31, Issue 6

This issue contains the proceedings of the “Porous Ceramics: Novel Developments and Applications” and “Next Generation Bioceramics” symposia, which were held on January 24-29, 2010 at the Hilton Daytona Beach Resort and the Ocean Center in Daytona Beach, Florida, USA.

The interaction between ceramic materials and living organisms is a leading area of ceramics research. Novel bioceramic materials are being developed that will provide improvements in diagnosis and treatment of medical and dental conditions. In addition, bioinspired ceramics and biomimetic ceramics have generated considerable interest in the scientific community. The “Next Generation Bioceramics” symposium addressed several leading areas related to the development and use of novel bioceramics, including advanced processing of bioceramics; biomineralization and tissue-material interactions; bioinspired and biomimetic ceramics; ceramics for drug delivery; ceramic biosensors; in vitro and in vivo characterization of bioceramics; mechanical properties of bioceramics; and nanostructured bioceramics.

The “Porous Ceramics” symposium aimed to bring together engineers and scientists in the area of ceramic materials containing high volume fractions of porosity, in which the porosity ranged from nano- to millimeters. These materials have attracted significant academic and industrial attention for use in environmental applications, an area where ceramics, particularly porous ones, play a key role because of their suitable properties. Therefore, a significant number of contributions, of which some are present in this volume, was devoted to the fabrication and characterization of porous ceramics for gas purification (e.g., H<sub>2</sub> separation and CO<sub>2</sub> separation) as well as to particulate filtration (e.g., diesel engine soot).

A leading area of ceramics research involves the development of porous ceramics for medical, dental, and biotechnology applications. For example, porous ceramics are under development for use as bone substitutes because a porous structure may enhance tissue ingrowth. Therefore, tailoring of porosity to give specific characteristics, in terms of the amount of interconnecting cells and of the cell and cell window size is required. A joint session involving participants from bioceramics and porous ceramics symposia was therefore held in order to stimulate discussion and productive interactions between the two scientific communities.

### **From reader reviews:**

#### **Shirley Joy:**

What do you think about book? It is just for students because they are still students or the idea for all people in the world, the particular best subject for that? Merely you can be answered for that issue above. Every person has distinct personality and hobby for every other. Don't to be pressured someone or something that they don't would like do that. You must know how great along with important the book Advances in Bioceramics and Porous Ceramics III: Ceramic Engineering and Science Proceedings, Volume 31, Issue 6. All type of book are you able to see on many options. You can look for the internet sources or other social media.

#### **Ellen Jones:**

What do you in relation to book? It is not important along with you? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on guardería until university need that Advances in Bioceramics and Porous Ceramics III: Ceramic Engineering and Science Proceedings, Volume 31, Issue 6 to read.

#### **Chris Robertson:**

Typically the book Advances in Bioceramics and Porous Ceramics III: Ceramic Engineering and Science Proceedings, Volume 31, Issue 6 has a lot of information on it. So when you read this book you can get a lot of benefit. The book was written by the very famous author. The writer makes some research ahead of write this book. This specific book very easy to read you may get the point easily after looking over this book.

#### **Norbert Walling:**

Is it you actually who having spare time then spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Advances in Bioceramics and Porous Ceramics III: Ceramic Engineering and Science Proceedings, Volume 31, Issue 6 can be the answer, oh how comes? A fresh book you know. You are consequently out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
