Cecie Starr, Beverly McMillan

Human Biology (with CD-ROM and InfoTrac) (Available Titles CengageNOW) Cecie Starr, Beverly McMillan

In this 6th edition of HUMAN BIOLOGY, Cecie Starr and Bev McMillan have created a friendly, issues-oriented book with enormous instructional power. The Sixth Edition of Starr and McMillan's best-selling HUMAN BIOLOGY is designed to help students understand human biology by engaging them in learning in every way possible. Segments on the FREE accompanying interactive CD-ROM, as well as the CNN Today videos, Web links, and reading from the InfoTrac College Edition library are all integrated with the text to support, illuminate, and reinforce the text. The chapter opening "Impacts, Issues" case study focuses students on a key biology-related societal issue and is revisited throughout the chapter. Then the chapter's "How Would You Vote?" feature asks students to consider a related news topics, gather and evaluate pro/con information, apply knowledge, and cast a vote on the Web. Students can see how peers in their state and across the nation voted. The free Student CD-ROM provides access to BiologyNow, a powerful diagnostic learning tool that helps students assess their unique study needs through pretests and personalized learning plans. The content has been updated as well. Several key chapters have been reorganized to improve the flow of ideas and to better tie core concepts to illustrations. For example, the chapter on digestion and nutrition has expanded coverage of dietary guidelines and weight control. Chapter 9 provides a more focused, better-illustrated discussion of heart structure, the cardiac cycle, and circuits of blood flow. Coverage of human evolution is expanded in Chapter 24. Other updated content can be found in the chapters on the muscular system, digestive system, and cardiovascular system. There is also expanded coverage of topics such as food allergies, newly emerging infectious diseases including SARS, "Mad Cow" disease, and West Nile virus. Sections on disorders of the nervous system and immune system have been expanded too
