**MPEG Video Compression Standard (Digital Multimedia Standards Series)** Chad Fogg, Didier J. LeGall, Joan L. Mitchell, William B. Pennebaker

This book initiates a new digital multimedia standards series. The purpose of the series is to make information about digital multimedia standards readily available. Both tutorial and advanced topics will be covered in the series, often in one book. Our hope is that users will find the series helpful in deciding what standards to support and use while implementors will discover a wealth of technical details that help them implement those standards correctly. In today's global economy standards are increasingly important. Yet until a standard is widely used, most of the benefits of standardization are not realized. We hope that standards committee chairpeople will organize and encourage a book in this series devoted to their new standard. This can be a forum to share and preserve some of the "why" and "how" that went into the development of the standard and, in the process, assist in the rapid adoption of the standard. Already in production for this series are books titled Digital Video: Introduction to MPEG-2 and Data Compression in Digital Systems.
