The Evolution of the Gilgamesh Epic Jeffrey H. Tigay

The Epic of Gilgamesh is one of the world's oldest known epics--it predates Homer by several centuries and is recognized as seminal to the cultural history of the Ancient Near East. Interpretation and decipherment of the story of Gilgamesh--fragmentary and contradictory as its several variants are--has been a monumental scholarly task, spanning more than a century...until Jeffrey Tigay teased out the epic's evolution. In this volume, Tigay traces the development of the composition of The Gilgamesh Epic over nearly two millennia and through the several languages in which it has been transmitted. The result is a study both comprehensive in breadth and impressive in methodology. The author breaks from his scholarly predecessors in relying on documented textual evidence rather than on critical analysis and hypotheses.

The immense contribution represented by this study has been acknowledged since its first publication in 1982. This reprint edition once again makes Tigay's groundbreaking work readily available to humanists, historians of literature and religion, biblical and classical scholars, anthropologists, and folklorists.
