Building Machine Learning Systems with Python - Second Edition

Luis Pedro Coelho, Willi Richert

Building Machine Learning Systems with Python - Second Edition Luis Pedro Coelho, Willi Richert

Get more from your data through creating practical machine learning systems with Python

About This Book

- Build your own Python-based machine learning systems tailored to solve any problem
- Discover how Python offers a multiple context solution for create machine learning systems
- Practical scenarios using the key Python machine learning libraries to successfully implement in your projects

Who This Book Is For

This book primarily targets Python developers who want to learn and use Python's machine learning capabilities and gain valuable insights from data to develop effective solutions for business problems.

What You Will Learn

- Build a classification system that can be applied to text, images, or sounds
- Use NumPy, SciPy, scikit-learn a€“ scientific Python open source libraries for scientific computing and machine learning
- Explore the mahotas library for image processing and computer vision
- Build a topic model for the whole of Wikipedia
- Employ Amazon Web Services to run analysis on the cloud
- Debug machine learning problems
- Get to grips with recommendations using basket analysis
- Recommend products to users based on past purchases

In Detail

Using machine learning to gain deeper insights from data is a key skill required by modern application developers and analysts alike. Python is a wonderful language to develop machine learning applications. As a dynamic language, it allows for fast exploration and experimentation. With its excellent collection of open source machine learning libraries you can focus on the task at hand while being able to quickly try out many ideas.

This book shows you exactly how to find patterns in your raw data. You will start by brushing up on your Python machine learning knowledge and introducing libraries. You'll quickly get to grips with serious, real-world projects on datasets, using modeling, creating recommendation systems. Later on, the book covers advanced topics such as topic modeling, basket analysis, and cloud computing. These will extend your abilities and enable you to create large complex systems.

With this book, you gain the tools and understanding required to build your own systems, tailored to solve your real-world data analysis problems.

From reader reviews:

Lupe Ware:

This Building Machine Learning Systems with Python - Second Edition book is just not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is information inside this publication incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. That Building Machine Learning Systems with Python - Second Edition without we know teach the one who examining it become critical in pondering and analyzing. Don't end up being worry Building Machine Learning Systems with Python - Second Edition can bring when you are and not make your case space or bookshelves' come to be full because you can have it in your lovely laptop even telephone. This Building Machine Learning Systems with Python - Second Edition having fine arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Sally McGarvey:

Reading a publication tends to be new life style in this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Together with book everyone in this world could share their idea. Books can also inspire a lot of people. Lots of author can inspire their own reader with their story or maybe their experience. Not only the story that share in the books. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some analysis before they write with their book. One of them is this Building Machine Learning Systems with Python - Second Edition.

Chris Wolf:

Beside this particular Building Machine Learning Systems with Python - Second Edition in your phone, it could give you a way to get more close to the new knowledge or details. The information and the knowledge you can got here is fresh from the oven so don't become worry if you feel like an old people live in narrow village. It is good thing to have Building Machine Learning Systems with Python - Second Edition because this book offers to you readable information. Do you occasionally have book but you do not get what it's exactly about. Oh come on, that will not happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. Use you still want to miss this? Find this book as well as read it from now!

Julie Bailey:

Do you like reading a publication? Confuse to looking for your selected book? Or your book seemed to be rare? Why so many issue for the book? But any people feel that they enjoy regarding reading. Some people likes looking at, not only science book but novel and Building Machine Learning Systems with Python - Second Edition or maybe others sources were given information for you. After you know how the fantastic a

book, you feel wish to read more and more. Science reserve was created for teacher or students especially. Those textbooks are helping them to bring their knowledge. In different case, beside science publication, any other book likes Building Machine Learning Systems with Python - Second Edition to make your spare time more colorful. Many types of book like this one.
