An Investigation of the Laws of Thought

On which are founded the mathematical theories of logic and probabilities

By George Boole

The Laws of Thought, more precisely, An Investigation of the Laws of Thought on Which are Founded the Mathematical Theories of Logic and Probabilities, was an influential 19th century book by George Boole, the second of his two monographs on algebraic logic. It was published in 1854. Boole was Professor of Mathematics of then Queen's College, Cork in Ireland.

The following work is not a republication of a former treatise by the Author, entitled, "The Mathematical Analysis of Logic." Its earlier portion is indeed devoted to the same object, and it begins by establishing the same system of fundamental laws, but its methods are more general, and its range of applications far wider. It exhibits the results, matured by some years of study and reflection, of a principle of investigation relating to the intellectual operations, the previous exposition of which was written within a few weeks after its idea had been conceived.

That portion of this work which relates to Logic presupposes in its reader a knowledge of the most important terms of the science, as usually treated, and of its general object. On these points there is no better guide than Archbishop Whately's "Elements of Logic," or Mr. Thomson's "Outlines of the Laws of Thought." To the former of these treatises, the present revival of attention to this class of studies seems in a great measure due. Some acquaintance with the principles of Algebra is also requisite, but it is not necessary that this application should have been carried beyond the solution of simple equations. For the study of those chapters which relate to the theory of probabilities, a somewhat larger knowledge of Algebra is required, and especially of the doctrine of Elimination, and of the solution of Equations containing more than one unknown quantity.

From reader reviews:

Paul Skeens:

The book An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities give you a sense of feeling enjoy for your spare time. You may use to make your capable much more increase. Book can for being your best friend when you getting stress or having big problem with your subject. If you can make examining a book An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities to be your habit, you can get a lot more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You are able to know everything if you like open and read a e-book An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this reserve?

Linda Christopher:

Do you among people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities book is readable by you who hate those perfect word style. You will find the info here are arrange for enjoyable examining experience without leaving actually decrease the knowledge that want to offer to you. The writer associated with An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities content conveys the thought easily to understand by lots of people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities is not loveable to be your top list reading book?

William Holmes:

Spent a free a chance to be fun activity to perform! A lot of people spent their free time with their family, or all their friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? May be reading a book could be option to fill your no cost time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the e-book untitled An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities can be excellent book to read. May be it can be best activity to you.

Tammy Dorris:

Many people spending their time frame by playing outside using friends, fun activity with family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, ya think reading a book really can hard because you have to bring the book everywhere? It fine you can

have the e-book, getting everywhere you want in your Cell phone. Like An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities which is obtaining the e-book version. So , try out this book? Let's notice.
