MANUAL FOR PHYSICAL AGENTS, 6/e is a core education resource for modern physical therapists, therapist assistants, and athletic trainers. It integrates concise summaries of the theoretical background and available evidence for each technique; step-by-step instructions presented generically, without brand names; and broad coverage of most current techniques. Designed for easy use, its lay-flat spiral binding remains open while students practice independently in laboratory sessions; concise tables provide fast access to essential information. This edition offers stronger focus on evidence-based practice; a new chapter on evaluating new interventions; new study and discussion questions; and extensive new topic coverage: from controlled cold compression to electrical stimulation for tissue repair.
