Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C

Expert petroleum geologists David Roberts and Albert Bally bring you *Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps*, volume three in a three-volume series covering Phanerozoic regional geology and tectonics. Its key focus is on both volcanic and non-volcanic passive margins, and the importance of salt and shale driven by sedimentary tectonics to their evolution. Recent innovative research on such critical locations as Iberia, Newfoundland, China, and the North Sea are incorporated to provide practical real-world case studies in regional geology and tectonics. The vast amount of volcanic data now available to form accurate hydrocarbon assessments and analysis at passive margin locations is also included into this thorough yet accessible reference.

- Named a 2013 Outstanding Academic Title by the American Library Association's *Choice* publication
- A "how-to" practical reference that discusses the impact of the development of passive margins and cratonic basins on the structural evolution of the Earth in regional geology and tectonic applications.
- Incorporates the increased availability of industry data to present regional seismic lines and cross-sections, leading to more accurate analysis and assessment of targeted hydrocarbon systems
- Analyses of passive margins and cratonic basins in East Africa, China, Siberia, the Gulf of Suez, and the Laptev Sea in the Russian Arctic provide immediately implementable petroleum exploration applications
- Summaries of analogue and theoretical models are provided as an essential backdrop to the structure and stratigraphy of various geological settings.

From reader reviews:

Ethel Ellis:

This Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C tend to be reliable for you who want to certainly be a successful person, why. The main reason of this Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C can be one of several great books you must have is usually giving you more than just simple studying food but feed an individual with information that perhaps will shock your earlier knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed ones. Beside that this Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C giving you an enormous of experience such as rich vocabulary, giving you trial of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Donna Miller:

Typically the book Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C has a lot associated with on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. The author makes some research previous to write this book. This book very easy to read you can obtain the point easily after looking over this book.

Irene Forrest:

In this age globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended to you personally is Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C this reserve consist a lot of the information from the condition of this world now. This particular book was represented how do the world has grown up. The dialect styles that writer value to explain it is easy to understand. Often the writer made some research when he makes this book. That's why this book suited all of you.

James Drennan:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person just like reading or as looking at become their hobby. You must know that reading is very important along with book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update about something by book. Numerous books that can you choose to use be your object. One of them are these claims Regional Geology

and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps: 1C.
