## **Categories for the Working Mathematician (Graduate Texts in Mathematics)** Saunders Mac Lane

An array of general ideas useful in a wide variety of fields. Starting from the foundations, this book illuminates the concepts of category, functor, natural transformation, and duality. It then turns to adjoint functors, which provide a description of universal constructions, an analysis of the representations of functors by sets of morphisms, and a means of manipulating direct and inverse limits. These categorical concepts are extensively illustrated in the remaining chapters, which include many applications of the basic existence theorem for adjoint functors. The categories of algebraic systems are constructed from certain adjoint-like data and characterised by Beck's theorem. After considering a variety of applications, the book continues with the construction and exploitation of Kan extensions. This second edition includes a number of revisions and additions, including new chapters on topics of active interest: symmetric monoidal categories and braided monoidal categories, and the coherence theorems for them, as well as 2-categories and the higher dimensional categories which have recently come into prominence.

### **From reader reviews:**

#### **Sun Byrd:**

The book *Categories for the Working Mathematician* (Graduate Texts in Mathematics) gives you the sense of being enjoy for your spare time. You need to use to make your capable a lot more increase. Book can to get your best friend when you getting tension or having big problem along with your subject. If you can make reading through a book *Categories for the Working Mathematician* (Graduate Texts in Mathematics) to get your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You could know everything if you like wide open and read a guide *Categories for the Working Mathematician* (Graduate Texts in Mathematics). Kinds of book are several. It means that, science publication or encyclopedia or other individuals. So , how do you think about this book?

#### **Arthur Elsberry:**

This *Categories for the Working Mathematician* (Graduate Texts in Mathematics) book is just not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is usually information inside this guide incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This specific *Categories for the Working Mathematician* (Graduate Texts in Mathematics) without we realize teach the one who reading through it become critical in considering and analyzing. Don't possibly be worry *Categories for the Working Mathematician* (Graduate Texts in Mathematics) can bring once you are and not make your tote space or bookshelves' turn into full because you can have it in the lovely laptop even telephone. This *Categories for the Working Mathematician* (Graduate Texts in Mathematics) having fine arrangement in word along with layout, so you will not really feel uninterested in reading.

#### **Barbara Baker:**

Reading a book tends to be new life style within this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Having book everyone in this world can share their idea. Books can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or maybe their experience. Not only the storyline that share in the ebooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on this planet always try to improve their talent in writing, they also doing some research before they write to their book. One of them is this *Categories for the Working Mathematician* (Graduate Texts in Mathematics).

#### **Terrie Anderson:**

Exactly why? Because this *Categories for the Working Mathematician* (Graduate Texts in Mathematics) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will jolt you with the secret the item inside. Reading this book next to it was fantastic author who else write the book in such

awesome way makes the content on the inside easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of gains than the other book include such as help improving your skill and your critical thinking way. So , still want to hold up having that book? If I ended up you I will go to the e-book store hurriedly.
