Math Facts. Whoever said learning math had to be uninteresting?

Parents, which do you suppose your child would find more interesting, Math Facts Hangman on his favourite device or a math facts worksheet?

Moms and Dads, do any of these sound familiar?

Do you have a 9-12 year old technology savvy child who:

- doesn't like reading
- doesn't like books
- says school is boring
- says the work is too hard (even though he's a smart kid)
- **can't be without his "iDevice" longer than 15 minutes**
- is not performing at school as well as you know he could

Then I've got the solution for you...

The Secondary Schools Entrance Examination Revision Guides and Tests. These materials were developed for my own 10 and 11 year olds who magically disappear when they hear the rustle of paper.

Do you find yourself hiding these addictive devices during school time and bringing them out only on the weekend?

Do you wonder why such an expensive gizmo is **only being used to play games?**

Do you find yourself using these devices as bargaining chips?

Well now you can **put those distracting devices to good use** like I did. **Adopt the Secondary Schools Entrance Examination Revision Guides and Tests.**

These guides break down into bite sized chunks every concept the average 9 to 12 year old must know and make them available on those devices that our kids love so much and can't seem to do without.

The tests tell you when your child has mastered the material and is ready to move on. I've dubbed them "**Tests That Don't Feel Like Tests**" because they don't. Does a hangman game feel like a test? Or does a face-off between ignorant Pongman and intelligent RoboHelper feel like a test?

Playful yet Serious

Don't be fooled by the playful nature of this eBook. It gives your child practice with word problems as well as multiplying, dividing, adding and subtracting small numbers

The oven can hold 8 pies. The baker filled the oven 9 times. How many pies did he bake?

64 / 81 / 72 / 63

Sue is packing 56 plates in the cupboard. How many stacks will she have if she puts 8 plates in one stack?

8 / 6 / 7 / 9

Just do it

If you've been **pulling out your hair** trying to get your 9-12 year old to sit still long enough to learn math facts, then scroll up and **get this eBook** because the Secondary Schools Entrance Examination Revision Guides and Tests were designed for parents just like you. **Let the journey to math readiness for secondary school continue...**
