In the face of America's militarism this book is a fresh look at the American cultural traits of the hoarding of wealth and the culture of war that supports it. Following our language back to its historical source the Anglo Saxon Germanic viking tribes we find the roots of these behaviors along with our competitive social structure and the idea of divine privilege. Do you know why we have Wodensday (Wednesday) and Thorsday (Thursday) each weekly cycle? This tale is told by one of their own a tribal story teller --- of the common folk but with compassion for those we dominated with our finely crafted iron weapons. It is similar to Zinn's Peoples history but with a broader scope of time. The story begins with the first written observations of the Germanic tribes and their conquest of the British Isle. Having the descendants of Woden with them and their finely crafted weapons they conquered. First Britain after Rome left then North America a 1000 years later. Not satisfied they moved out across the oceans to foreign shores where they conquered areas for safe trading posts and now the Americans have over 750 foreign military bases all over the world. This selfish competitive way of living is tearing up the earth and her peoples. The book goes on to contrast this way of living to the way of cooperation and sharing. These are the truly healthy ways of human existence that is practiced by some societies that have not been destroyed by the warrior cultures. These are the ways Jesus taught cooperation and love. This book offers a fresh look at the story of Jesus, that of a great human being who traveled to India as a teenager and on to Tibet before returning to Jerusalem. As a highly developed human he brought an eastern message back, God is love. The ancient Buddhist and the Hindu Vedic traditions share the same root, a way of relating to the intelligent and loving cooperative universe. Science is just beginning to understand many of the finer workings of the Universe. There is a lot of cutting edge science that shows that human beings can heal others with remote intention. Human beings have many higher abilities that we in the western mechanical world can not at this time perceive. As long as we remain materialistic vikings living at high speed to gain wealth we can never cleanse our hearts to begin the path of higher human development. The book hopes to promote healing and a new sense of our place in this intelligent universe
