x system Ib-TEX. I wish to thank her for the beautiful work and the numerous discussions on the contents of this book. I am indebted to Peter Fassler, Neu-Technikum Buchs, Switzerland, for drafting the figures, to my students Kurt Rothermann and Stefan Strahl for computer enhancing and labeling the graphics, to Pascal Felder and Markus Wittwer for a simulation program that generated the figures in the stochastics sections. My thanks go to my new colleague at work, Daniel Neuenschwander, for the inspiring discussions related to the section in stochastics and for reading the manuscript to it. I am also grateful to Dacfey Dzung for reading the whole manuscript. Thanks go especially to Professor /Valter Gander of ETH, Zurich, who at the finishing stage and as an expert of 'JEXgenerously invested numerous hours to assist us in solving software as well as hardware problems; thanks go also to Martin Muller, Ingenieurschule Biel, who made the final layout of this book on the NeXT computer. Thanks are also due to Helmut Kopka of the Max Planck Institute, for solving software problems, and to Professor Burchard Kaup of the Uni- versity of Fribourg, Switzerland for adding some useful software; also to Birkhauser Boston Inc. for the pleasant co-operation. Finally, let me be reminiscent of Professor E. Stiefel (deceased 1978) with whom I had many interesting discussions and true co-operation when writing the book in German.

From reader reviews:

Ann Wren:

Information is provisions for individuals to get better life, information today can get by anyone on everywhere. The information can be a information or any news even a concern. What people must be consider if those information which is within the former life are difficult to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Group Theoretical Methods and Their Applications as the daily resource information.

Mary Jones:

People live in this new morning of lifestyle always try and and must have the time or they will get wide range of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely yes. People is human not a robot. Then we request again, what kind of activity have you got when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, often the book you have read is actually Group Theoretical Methods and Their Applications.

Samuel Gorman:

This Group Theoretical Methods and Their Applications is brand new way for you who has curiosity to look for some information as it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know otherwise you who still having little bit of digest in reading this Group Theoretical Methods and Their Applications can be the light food for you personally because the information inside that book is easy to get simply by anyone. These books develop itself in the form that is certainly reachable by anyone, yes I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this book is the answer. So there is no in reading a guide especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book type for your better life as well as knowledge.

Jacqueline Ramos:

What is your hobby? Have you heard this question when you got college students? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person like reading or as reading become their hobby. You have to know that reading is very important and also book as to be the matter. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you go onto be your object. One of them is actually Group Theoretical Methods and Their Applications.
