Edward I and the Governance of England, 1272-1307 (Cambridge Studies in Medieval Life and Thought: Fourth Series) Caroline Burt

This important exploration of the reign of Edward I - one of England's most lionised, feared and successful monarchs - presents his kingship in a radical new light. Through detailed case studies of Shropshire, Warwickshire and Kent, Caroline Burt examines how Edward's governance at a national level was reflected in different localities. She employs novel methodology to measure levels of disorder and the effects of government action, and uncovers a remarkably sophisticated approach to governance. This study combines an empirical examination of government with an understanding of developing political ideas and ideological motivation and contributes towards a greater understanding of the development of local government and politics in England in the thirteenth and fourteenth centuries. Edward emerges as a king with a coherent set of ideas about the governance of his realm, both intellectually and practically, whose achievements were even more remarkable than has previously been recognised.
