## **There Are No Electrons: Electronics for Earthlings** Kenn Amdahl

An off-beat introduction to the workings of electricity for people who wish Richard Brautigan and Kurt Vonnegut had teamed up to explain inductance and capacitance to them. Despite its title, it's not wild ranting pseudo-science to be dismissed by those with brains. Rather, Amdahl maintains that one need not understand quantum physics to grasp how electricity works in practical applications. To understand your toaster or your fax machine, it doesn't really matter whether there are electrons or not, and it's a lot easier and more fun to start with the toaster than with quarks and calculus. The book is mildly weird, often funny, always clear and easy to understand. It assumes the reader doesn't know a volt from a hole in the ground and gently leads him or her through integrated circuits, radio, oscillators and the basics of the digital revolution using examples that include green buffalo, microscopic beer parties, break-dancing chickens and naked Norwegian girls in rowboats. OK, it's more than mildly weird.

The book has been reprinted numerous times since 1991 and has achieved minor cult status. Reviewed and praised in dozens of electronics and educational magazines, it is used as a text by major corporations, colleges, high schools, military schools and trade schools. It has been studied by education programs at colleges across the United States. This book was making wise cracks in the corner before anyone thought of designing books for dummies and idiots; some say it helped to inspire that industry.

It may be the only "introduction to electronics books" with back cover comments by Dave Barry, Ray Bradbury, Clive Cussler, and George Garrett, as well as recommendations from Robert Hazen, Bob Mostafapour, Dr. Roger Young, Dr. Wayne Green, Scott Rundle, Brian Battles, Michelle Guido, Herb Reichert and Emil Venere. As Monitoring Times said, "Perhaps the best electronics book ever. If you'd like to learn about basic electronics but haven't been able to pull it off, get *There Are No Electrons*. Just trust us. Get the book."

### **From reader reviews:**

#### **Heather Sessoms:**

Book is to be different for each and every grade. Book for children until adult are different content. To be sure that book is very important usually. The book There Are No Electrons: Electronics for Earthlings has been making you to know about other information and of course you can take more information. It is quite advantages for you. The e-book There Are No Electrons: Electronics for Earthlings is not only giving you a lot more new information but also for being your friend when you truly feel bored. You can spend your current spend time to read your e-book. Try to make relationship with the book There Are No Electrons: Electronics for Earthlings. You never really feel lose out for everything in case you read some books.

#### **Jerry Rivera:**

Information is provisions for those to get better life, information nowadays can get by anyone with everywhere. The information can be a understanding or any news even a problem. What people must be consider if those information which is within the former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you understand it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take There Are No Electrons: Electronics for Earthlings as your daily resource information.

#### **Beverly Turner:**

As we know that book is vital thing to add our knowledge for everything. By a book we can know everything we would like. A book is a pair of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve There Are No Electrons: Electronics for Earthlings was filled in relation to science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading the book. If you know how big benefit from a book, you can experience enjoy to read a e-book. In the modern era like at this point, many ways to get book you wanted.

#### **Yolanda Harris:**

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some e-book, they are complained. Just minor students that has reading's internal or real their interest. They just do what the teacher want, like asked to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring in addition to can't see colorful images on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this There Are No Electrons: Electronics for Earthlings can make you really feel more interested to read.
